Dear [REDACTED]

We acknowledge receipt of your correspondence dated 5 February 2024 in response to our PAIA request. We wish to address claims in your letter under reply that undermine transparency and corporate accountability demanded by ss 32 and 24 of the Constitution of the Republic of South Africa, 1996, among others. We reserve the right to respond more fully in due course, should the need arise. To the extent that we do not address specific claims, they should be taken to be denied.

Your client's refusal to provide access to information is noted with dismay. It is disappointing that your firm continues to advise clients to undermine the spirit, purport, and objects of the Constitution and the Protection of Access to Information Act (PAIA).

As you know, another client of your firm was reminded by the Supreme Court of Appeal that it was not to its "*credit, espousing, as it does, a commitment to environmental sensitivity and asserting a collaborative approach to ensuring that environmental degradation is limited, to then assume an obstructive and contrived approach to a request for information which can only assist that collaborative effort*". Your clients would be well advised to heed this remark.

Ad para 3.1

Your clients' allegation that our request "fails to meet the mandatory stipulated procedural requirements of s 53(2)(d) of PAIA" is incorrect. We urge you to consult case law on PAIA's threshold. In terms of s53(2)(d), ALRSA is required to identify the right that we are seeking to exercise or protect and provide an explanation of why the requested records are required for the exercise or protection of that right. We have met the necessary threshold.

Ad para 3.2

Despite your regrettable suggestions to the contrary, animal cruelty is a serious human rights issue that concerns us all, particularly in the context of food systems that impact on consumer health and well-being and the environment. Our request pursues corporate accountability in relation to animal welfare and environmental harm prevalent in the egg industry, in which your clients are participants. As a civil society organisation and registered non-profit, we are entitled to exercise our constitutional rights to freedom of expression (s16), access to information (s32), and to an

environment not harmful to health or well-being, including to have the environment protected for the benefit of present and future generations (s24).

Your suggestion that we would only be entitled to access to the requested information if empowered by statute to enforce relevant laws reveals a high level of ignorance in relation to the duties imposed on your clients by PAIA and the Constitution. We have a legitimate role in advancing interrelated concerns for animal welfare, environmental protection, and human health and well-being in the public interest. Your clients have concomitant statutory and constitutional duties given the rights we seek to protect. It is deeply troubling that your clients are not being properly advised on their duties.

Ad para 3.3

In terms of our PAIA request dated 4 December 2024, we rely on the environmental right, which protects animal welfare and environmental harms caused by the egg supply chain. We further provided ample justification as to why the requested records are required for the protection of the environmental right within our PAIA request. Your clients' refusal to acknowledge our concerns for animal welfare and environmental protection as giving rise to a legitimate basis to request information illustrates a worrying lack of care for the environment and all beings who live in it.

Ad para 5

In the spirit of cooperation, we remain willing to engage constructively and in good faith with your clients in relation to the content of our reporting, both prior to and post-publication, should your clients wish to do so. This has been our approach from the outset. We again encourage your clients to engage with us.

Any ill-advised attempt to stifle the exercise of our rights, including our rights to freedom of expression and public participation in pursuit of environmental protection will be strenuously defended, including by invoking the strategic litigation against public participation ("SLAPP") defence recently pronounced upon by the Constitutional Court, if necessary. Our rights are fully reserved in this respect.

We encourage your clients to adopt an open, cooperative, and transparent stance, as many other role players in the egg industry have done in our engagements with them.

All our rights remain reserved.

Kindly acknowledge receipt of this email.

Kind regards
